## COURSE DESCRIPTION

This educational event will help you in your professional career in Oncology and Palliative Care. Our educational sessions will showcase the most up-to-date information to help you provide quality care to your patients and caregivers.

## OBJECTIVES

- Utilize new communication strategies to facilitate election of hospice benefits
- Discuss basics of breast cancer treatment
- Describe the survival and quality of life benefits of adding palliative/supportive care to usual oncology care
- Discuss recent advancements in immunotherapies available for malignancies
- Develop strategies for finding compassion in situations in which hope for cure is unaligned with medical predictions
- Determine factors for diagnosing malnutrition and recognizing refeeding syndrome
- Discuss awareness and implementation of radical self-care using boundaries, emotional resilience and healthy internal scripts
